

Company Profile

Fike Builders, Inc., headquartered in Coolidge, AZ, is a full-service, “Certified Green” General Contractor, specializing in new construction and remodel applications. In addition to construction, our core competencies include, solar installations, facility management, security products, complete with 24-hour technical support, service and detailed management. Our mission is to become the premier General Contractor for financial institution construction, green technology conversions, security products, complete with the latest technology and friendly customer service. Fike Builders is positioned as a leading supplier of solar, security and financial products, offering complete installation, full-service management and monitoring to any residential, commercial, industrial or financial institution application.

Fike Builders is a fourth generation construction team, built on the idea of excellence for any job, big or small. Our core principles include: honesty, delivering on-time and on-schedule, complete customer satisfaction with project completion. Our belief is “better seeing it’s done, than hearing it’s done.” Fike Builders has built a reputation for success based on service, reliability and performance. Fike Builders is emerging as the discerning choice for financial institutions searching for a trusted, reliable and proven partner.

Products & Solutions

Fike Builders, Inc. has partnered with companies sharing a similar vision and mission. Our strategic partnerships with companies such as: DC Power (Solar applications), NCR, Fortis Security, Honeywell, Digital Monitoring Products (DMP) and Triton Systems allow us to meet and exceed our customer’s expectations and maximize their program potential.
